## RG-651H GATEWAY

*Internet Gateway Designed for Medium Hotels and Venues*

The RG651h was designed to bring a powerful gateway solution to medium-sized hotels and venues to deliver a seamless guest experience. RG-651h is deployed in hotels, resorts, and other hospitality venues that have aggregated throughput up to 500 Mbps ISP connection and contains the features and benefits necessary to meet major hotel brand standards.

This multi-port device is designed for indoor use, offering hotspot, firewall, VPN, load balancing, and real-time configuration and monitoring. The RG-651h comes with 10 Gigabit LAN ports.

Each RG-651h gateway supports multi-level end user guest bandwidth management, automatic gaming system and streaming bypass, and the option to add "Remember Me" central authentication service to increase guest satisfaction and hotel guest scores, together with a remotely managed property dashboard support service.\*

The RG651h has been approved by major hotel brands worldwide and is also well suited to the following hospitality markets that require 500 concurrent users, with an upgrade capability to 1000 concurrent users upgrade license sold separately:

- Medium hotels
- Public space venues
- Gaming venues

If you want to meet or exceed your brand standards for HSIA at a reasonable cost, the RG-651h is for you. Please reach out to your account team today to learn how to make better guest WiFi, happier guests, and easier management a reality.

\*Support for "Remember Me" aka Centralized WiFi Authentication, automatic bypass for popular streaming and gaming devices, and automatic reporting requires integration with Hospitality WiFi guest support contract and services.
