BENEFITS

- **Cost-effective:** The RG-AP531 is a cost-effective, full-featured, cloud-managed in-wall access point designed for hotel guest rooms and SOHO applications.
- **Security:** While the majority of the security featues on any access point are controlled by other appliances on the network, the RG-AP531 supports the latest WEP/WPA/WPA2 features, as well as MAC filtering and station isolation.
- **Performance:** With the 700MHz Quad Core CPU, performance is of the highest quality. Top it all off with dual-band 2x2 2.4GHz & 5GHz omnidirectional smart antennas and you've got best in class.
- **Beyond WiFi:** In addition to spectacular performance statistics, the RG-AP531 also has additional features that include gateway and captive portal functions, guest isolation firewall, customizable splash pages, the ability to be cloud controlled, support for Hotspot 2.0 (future release), and support for up to 250 concurrent users.

FEATURE HIGHLIGHTS & SUPPORTED FEATURES

- Zero-configuration; plug-and-play
- Auto-discovery
- Enhanced cloud capabilities
- Centralized management
- Automatic updates
- 802.11ac Wave 2
- Dual-band 2X2 MIMO
- Analog phone passthrough (compatible with RJ11 and RJ45 plugs)
- Custom built for Hotels and MDU environments; special antenna built for Hospitality market
- Gateway and captive portal functions
- Guest isolation firewall
- Customizable splash pages
- IEEE 802.3af/at Power-over-Ethernet
- Works with standard single-gang wall boxes

RG-AP531

Enterprise-Class Dual-Band 2x2 MIMO 802.11ac Wave 2 In-Wall Access Point with Cloud-Based Management/Reporting Capabilities

The Radius Gateway RG-AP531 is an enterprise-class, cloud-controlled, high-performance, high-density in-wall 2x2 Access Point with integrated PoE. Suitable for high-bandwidth usage and based on proven technology already deployed in properties around the world, the RG-AP531 offers built-in gateway functionality, cloud management, and captive portal capabilities.

RG-AP531 is a plug-and-play access point that is perfect for use in locations such as hospitality venues, MDUs, coffee shops, and medical or legal offices. You can monitor your WiFi network performance, manage access and configurations, get notified about equipment status concerns before issues arise, view support data, and more. The RG-531 is designed for easier updating of security, firmware, and added features. The RG-531 also contains features and benefits necessary to meet major hotel brand standards for HSIA.

If you want to deploy enterprise-class technology at an affordable price, the RG-AP531 is for you. Please reach out to your Hospitality WiFi sales representative today to learn how to make better-quality WiFi, easier management, and happier users a reality.

SPECIFICATIONS

- 3-5/8in x 4-1/2in
- Phone (RJ11/RJ45) & Internet passthrough (RJ45) ports on the back
- 2 x 10/100/1000 Ethernet ports on the front
- 1 x RJ11/RJ45 phone port on the front
- IEEE 802.3af/at Power over Ethernet
- Dual-band 2X2 MIMO
